1993 Porsche 911 964 Turbo 3.6 for Sale in Dubai

A Rare Air-Cooled Porsche Icon

Discover an exceptional **1993 Porsche 911 964 Turbo 3.6 for sale in Dubai**, finished in timeless **Grey** with a classic **Black interior**. Showing **49,000 km**, this GCC-specification example is equipped with a manual transmission and represents one of the most celebrated chapters in the history of the Porsche 911 Turbo.

For collectors and enthusiasts, the 964 Turbo 3.6 holds a particularly special position within the Porsche lineage. Produced during the final years of the 964 generation, it combines the unmistakable silhouette of the classic 911 with turbocharged performance and the mechanical character associated with Porsche's air-cooled era.

For anyone searching for a **classic Porsche 911 Turbo for sale in Dubai**, this 1993 example offers an opportunity to experience a highly desirable generation in an understated and timeless colour combination.

Timeless Grey 964 Turbo Styling

The **Grey exterior** complements the distinctive shape of the 964 beautifully. Rather than relying on dramatic colours, this specification allows the unmistakable proportions of the Turbo to command attention.

Its wide rear bodywork and signature fixed rear spoiler give the 964 Turbo a muscular stance, while the compact dimensions and classic round headlamps preserve the traditional Porsche 911 identity.

More than three decades after its introduction, the 964 remains immediately recognisable. Its combination of purposeful styling and relatively clean design has helped make this generation increasingly desirable among enthusiasts looking for a Porsche that captures the character of the classic 911 era.

Classic Black Driver-Focused Interior

Inside, the **Black interior** maintains the purposeful and understated character of the exterior. The cabin reflects an era when the Porsche 911 placed a strong emphasis on the relationship between driver, controls and car.

Compared with today's technology-rich performance cars, the 964 provides a distinctly analogue environment. The straightforward cockpit, traditional instrumentation and manual gearbox all contribute to an experience centred around driver involvement.

For enthusiasts, this simplicity is a significant part of the attraction. The 964 Turbo comes from a period before digital displays and extensive electronic assistance became commonplace, giving it a character that is increasingly difficult to replicate in a modern sports car.

3.6-Litre Turbocharged Flat-Six and Manual Gearbox

At the heart of this Porsche is its **3.6-litre turbocharged flat-six engine**, paired with a **manual transmission**. This combination is central to the appeal of the 964 Turbo 3.6 and gives the car the distinctive mechanical personality associated with Porsche's air-cooled performance models.

The Turbo 3.6 was introduced late in the 964 production cycle, making it a particularly significant interpretation of the generation. Its turbocharged performance, rear-engined layout and manual gearbox create a driving experience that demands involvement and rewards precision.

For a collector, it represents more than outright performance figures. It is the combination of engineering, design, rarity and analogue driving character that has established the 964 Turbo 3.6 as an important Porsche.
